Re: Vector Named to Inc. Magazine's Top 5,000 Fastest Growing Private Companies in America; Named #36 on the Top Companies in Environmental Services

GRASS VALLEY, CALIFORNIA – Vector Engineering, Inc. is pleased to announce that the Company has been named to Inc. Magazine's Top 5,000 of the Fastest Growing Private Companies in America. Included in this honor was the ranking of #36 on the Top Companies in Environmental Services.

Founded in July 1986 in Grass Valley, California, Vector started in the home of its President, Mark Smith, with 3 employees. The Company's headquarters remains in Grass Valley and has now grown into a multi-million dollar international company with 360 employees located in 8 offices throughout North, Central and South America. Vector also has a full service geotechnical laboratory located at its corporate headquarters in Grass Valley.

Vector specializes in the application of civil engineering, hydrogeology, geology, and geotechnical and geological engineering to the mining, solid waste, and water resources industries.

For more information, contact Mark Smith (smith@vectoreng.com) or Scott Purdy (purdy@vectoreng.com) at 530-272-2448, or visit their website at www.vectoreng.com.
